MIT Seed Funds promote cutting-edge research collaborations and help to deepen partnerships between faculty and researchers at MIT and in Poland.

About the MIT-Poland Lockheed Martin Seed Fund

MISTI Global Seed Funds, of which MIT-Poland is a part, enable participating teams to collaborate with international peers, either at MIT or abroad, with the aim of developing and launching joint research projects. All general MISTI Global Seed Funds criteria, application and evaluation procedures apply.

Through an annual call for proposals, the fund promotes the exchange between faculty and students at MIT and at universities and public research institutions in Poland. The maximum award is \$25,000.

Applications will open on September 13 and have a submission deadline of December 13, 2021.

Questions? Contact Justin Leahey, jleahey@mit.edu

This year's priority area is Advanced Materials and Manufacturing, which includes:

- Additive Design
- Manufacturing Autonomy
- AI-Enabled Machining
- Manufacturing Line for Composites
- High Temperature and Speed Advanced Materials
- Composite and Polymer Structures
- Innovative Process Technologies
- Material Engineering
- Additive Manufacturing for Prototypes and Tooling

Special consideration will be given to proposals that:

- present a balanced exchange between the participants
- demonstrate complementarity between the teams
- involve undergraduate and graduate students
